

Installing Internet Explorer 11 for Windows 7

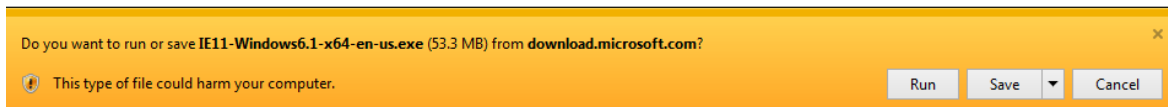

1. [Click here to go to the Internet Explorer 11 download page; make sure you open the webpage in Internet Explorer.](#)
2. Click the “Download” button.

Internet Explorer 11 for Windows 7

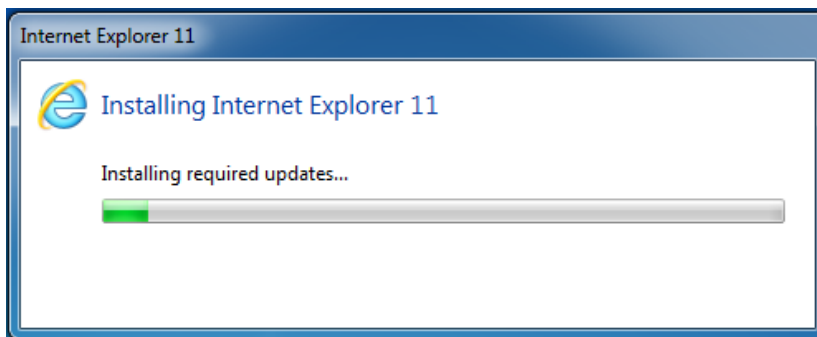

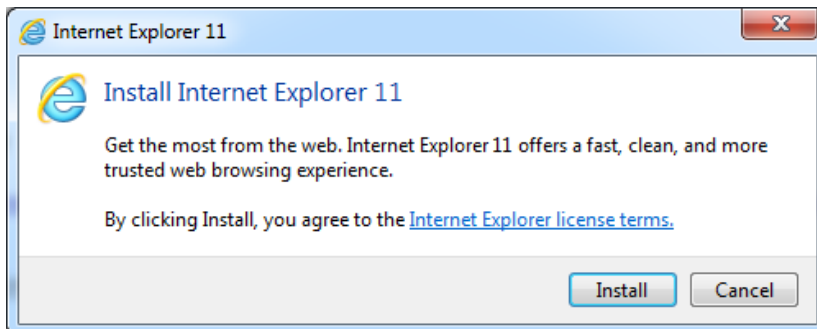

For your system: **Windows 7 64-bit** [Change Systems](#) ▾

Select Language: ▾

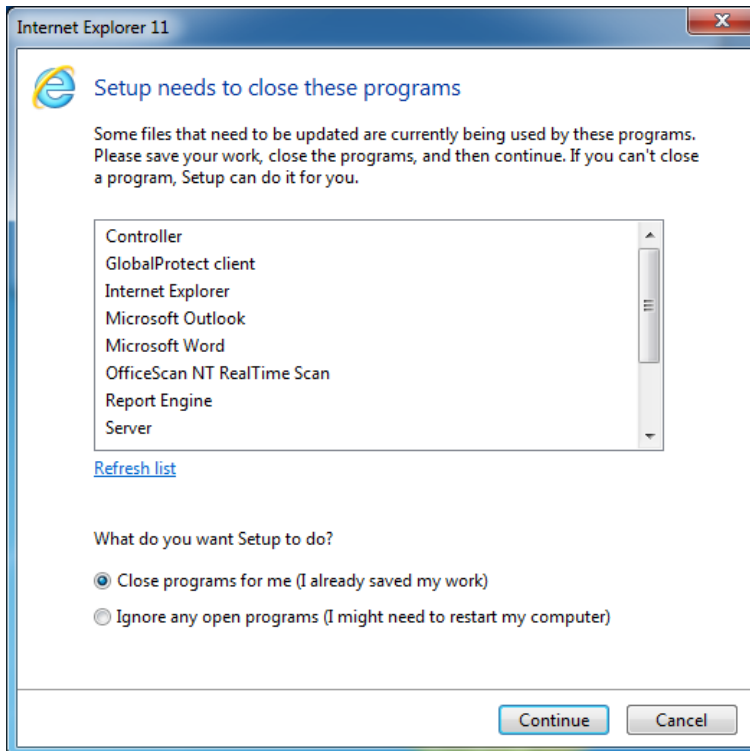

3. When the notification window appears asking if you want to run or save, click Run.

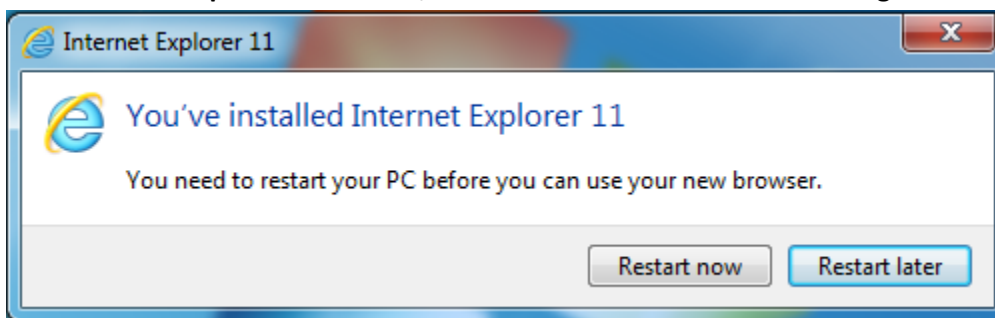

4. The next pop-up window will ask you install the software. Click “install.” The screen will then say “installing required updates.”

5. If you get the following pup-up screen, make sure you have saved any work in progress before hitting the “Continue” button.

6. After Internet Explorer is installed, click “Restart now” to finish installing.

7. Rebooting your computer will take about 5 minutes. After logging in, Internet Explorer will launch.
8. If you experience any issues with HDVLink after upgrading, click the setup file on the HDVLink login page

Frequently Asked Questions

Do I need to upgrade to Internet Explorer 11 if I have Windows 8, 8.1, or 10?

No, Windows 8, 8.1, and 10 should come with Internet Explorer 11 already installed.

Why do I need to upgrade to Internet Explorer 11?

Certain FCCS applications will no longer be supported on previous versions of Internet Explorer after December 7. More importantly, Microsoft will not support previous versions of Internet Explorer after January 12, 2016.

Who do I call with questions?
